

CCCS EPA data collection process gathered input from:

- 126 youth and 59 parents/caregivers through surveys (185 surveys in total)
- 51 participants (10 youth and 41 parents/caregivers) in 4 Tell Us sessions (small group conversations)
- 21 youth and 11 adult respondents via 4 Dream Walls (posters with key questions)

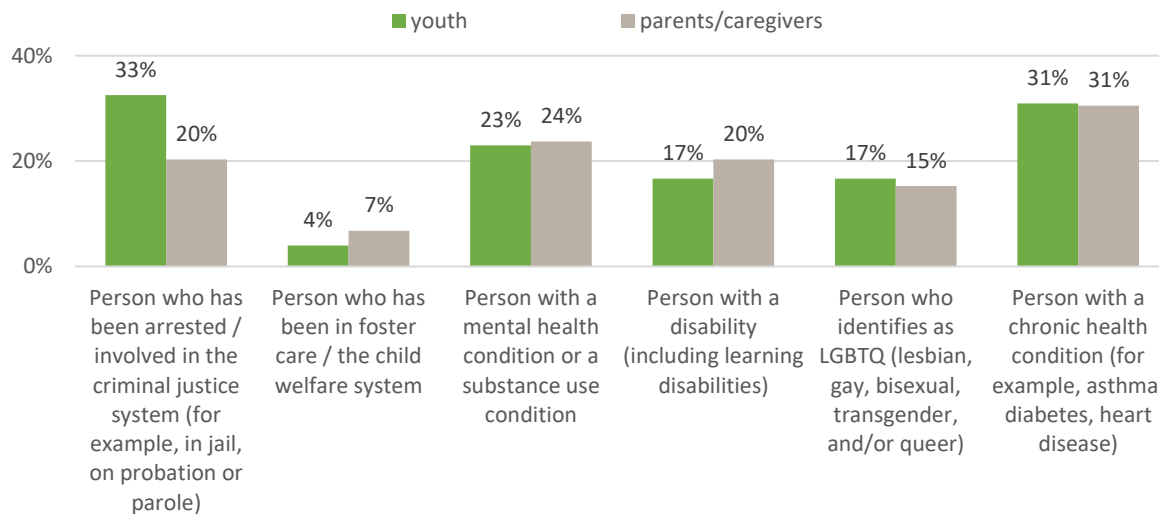

Languages that respondents speak at home/with their families (not mutually exclusive)

Respondent's race/ethnicity (not mutually exclusive)

Respondent and/or their family includes 1 or more...

62% of parent/caregiver respondents were a parent, 26% were extended family members, and 10% were siblings to the child(ren) they help take care of. The children they help take care of ranged in age from 1 to 24 years old, with the average 11 years old.

Age of Parent/Caregiver Respondents

Youth respondents ranged in age from 13 to 24 years old with an average age of 16.
