## San Mateo County Health System

### Place and policy

 Environments facilitate health and opportunities (complete streets/housing)

### Education

 Individual behavioral change (cooking demos, flyers, exercise classes)

### **Prevention Services**

 Healthcare and other services (screenings, preventative care, early detection)

### Treatment and Ongoing Support

Healthcare, support and social services, medical transport

### **Our Priorities**

- Stable and affordable housing protects health and provides the ability to engage in healthy opportunities
- Complete neighborhoods make it easy for residents to be healthy everyday in their communities
- High-quality education in healthy places creates pathways to better health
- A strong local economy builds household financial security for all and promotes everyone's health

### Our Framework

- Place-based prevention
- Advancing health equity
- Collaboration and partnership

## Areas of partnership

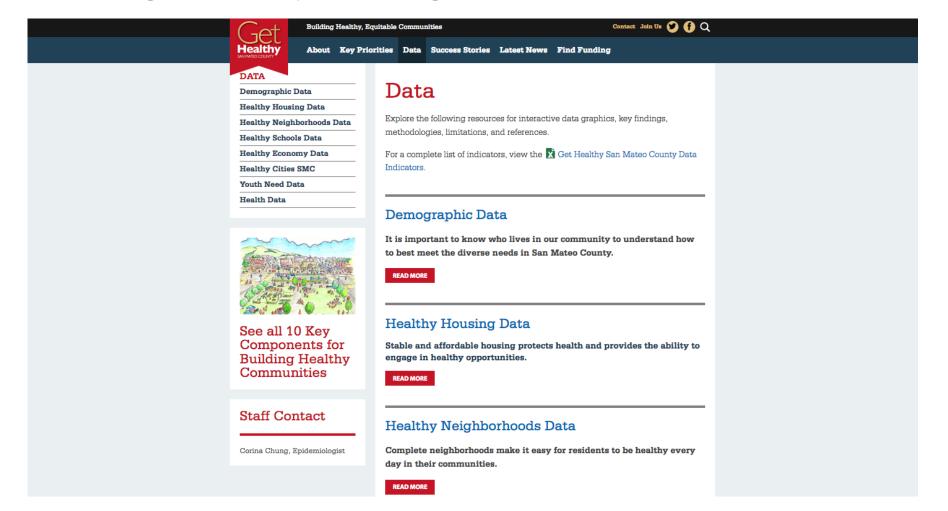

- Policy
- Planning
- Funding
- Research
- Capacity building/ leadership development
- Partnerships
- Communication

# Introduction, overview, and more resources

#### **Healthy San Mateo**

Where we live, learn, work, and play profoundly shape our ability to be healthy. Place impacts health by shaping the choices made available to us – and whether the healthy choice is the easy choice – through social, economic, and environmental factors known as social determinants of health.

These determinants of health are responsible for health inequilities, or preventable differences in health outcomes among populations. By building healthy, equitable communities that address these disparities, we can ensure that everyone has equitable opportunities to live a long and healthy life.

The Healthy Cities SMC profile is a snapshot of indicators for San Mateo County residents and the places they live, work and play. These measures help us understand the types of opportunities a city has to support health and why some places are healthier than others. Understanding why people in some cities live longer and have more opportunities to be healthy helps us identify what is working and what can be improved.

Indicators are organized by key priority areas identified through the 2015 strategic planning

process for how to create healthy, equitable communities in San Mateo County: Healthy Housing. Healthy Neighborhoods, Healthy Schools, and Healthy Economy. Demographic data is also provided in each profile. Health data is available through the San Mateo County Health System.

To see how San Mateo compares to other cities in San Mateo County, visit <u>Healthy</u> <u>Cities SMC</u>.

About Get Healthy San Mateo County
Get Healthy San Mateo County (GHSMC) is a
community collaborative of community-based
organizations, County agencies, cities,
schools, hospitals, and leaders working
together to advance healthy, equitable
communities in San Mateo County. GHSMC
uses policy change to prevent diseases and
ensure everyone has equitable opportunities
to live a long and healthy life. The
collaborative is facilitated by the San Mateo
County Health System.

GHSMC supports the advancement of the 10 essential public health services as defined by the Centers for Disease Control and Prevention. Learn more at www.GetHealthySMC.org.

### **Healthy Housing**

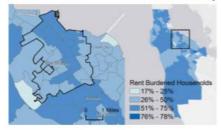

#### **Healthy Housing**

Stable and affordable housing protects health and provides the ability to engage in healthy opportunities. People who live in healthy, affordable places live longer, healthier lives.

Healthy Housing Indicators	San Mateo	San Mateo County
Median Rent <sup>1</sup>	\$1,871	\$1,830
Percent of Households Who Are Rent Burdened <sup>1,2</sup>	51%	52%
Percent of Households Occupied by Homeowner <sup>1</sup>	53%	59%
Percent of Households Who Are Overcrowded <sup>1</sup>	7%	8%
Percent of Regional Housing Needs Allocation for Very Low Income Households <sup>3</sup>	23%	20%
Number of Low-wage Jobs for Every One Affordable Housing Unit <sup>6</sup>	6	6
Percent of Employees that Don't Live Where They Work <sup>5</sup>	88%	63%

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5-year Estimates

#### Percent of Households with Rent Burden in San Mateo by Census Tract

Rent burden refers to households that spend 30% or more of their income on rent and other housing costs. Paying unaffordable housing costs diverts wages away from other important needs, such as health care and healthy food, making it more difficult to be healthy.

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5year Estimates

Note: Rent burden refers to households that spend 30% or more of their income on rent and other housing costs.

Note: The Regional Housing Needs Allocation (RHMA) is a state-required process to determine the number of housing units needed by income level in each city. ### Healthy Neighborhoods

#### **Healthy Neighborhoods**

Complete neighborhoods make it easy for residents to be healthy every day in their communities by making the healthy choice, the easy choice. Living near where you work and send your kids to school enables many opportunities for health. Creating vibrant complete neighborhoods allows people to safely walk and bike, purchase daily goods and services such

as healthy foods, and easily access affordable public transportation, parks and open space.

Healthy Neighborhoods Indicators	San Mateo	San Mateo County
Percent of Income for Average Transportation Costs for Block Groups Within ½ Mile of Transit <sup>1</sup>	17%	17%
Percent of Residents Who Take Active Transportation to Work <sup>2,3</sup>	14%	14%
Number of Daily Vehicle Miles Traveled Per Capita <sup>4</sup>	7	26
Number of Bicycle and Pedestrian Collisions Per 100,000 People <sup>5</sup>	59	53
Number of Severe or Fatal Bicycle and Pedestrian Collisions Per 100,000 People <sup>5</sup>	1	45
Percent of Households Enrolled in Food Stamps <sup>2</sup>	5%	4%
Number of Park Acres Per 1,000 People <sup>6</sup>	6	1

#### Bike & Pedestrian Collision Hot Spots in San Mateo

Bike and pedestrian collisions are collisions that involve bicyclists and/or pedestrians; most usually involve a motor vehicle as well. Collision hot spots are areas with clusters of collisions. Bike and pedestrian collisions can cause injuries and fatalities and contribute to motor vehicle accidents.

### Healthy Schools

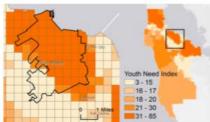

#### **Healthy Schools**

High-quality education creates pathways to better health. Education is one of the top determinants of health outcomes, and can set the stage for a child's future opportunities to access health promoting prospects such as jobs and stable housing.

Healthy Schools Indicators	San Mateo	San Mateo County
Youth Need Index <sup>1</sup>	37	24
Percent of Adults with a High School Degree or Less <sup>2</sup>	27%	27%
Percent of Adults with a Bachelor's Degree or Higher <sup>2</sup>	48%	47%

Note: Score is out of 100 points possible where higher score indicates higher need. Source: San Mateo County Health System, Office of Epidemiology and Evaluation, 2017 'Source: U.S. Denaus Bureau; 2017-2016 American Community Survey 5-year Estimates

#### Youth Need Index in San Mateo

The Youth Need Index reflects a combination of factors that impact youth success where higher scores (out of 100 total) indicate higher need. Data include Juvenile Probation and Behavioral Health hot spots, child maltreatment, low birthweight, student reading proficiency, suspensions and poverty.

### Healthy Economy

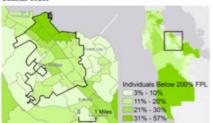

#### **Healthy Economy**

A strong local economy builds household financial security for all and promotes everyone's health. Access to income and wealth is one of the most important predictors of a person's health. The less money a person makes, the less opportunity they have to be healthy. Financial insecurity makes it difficult to afford and meet basic needs, leading to higher rates of

depression and stress, and subsequently more health problems.

Healthy Economy Indicators	San Mateo	San Mateo County
Median Household Income <sup>1</sup>	\$95,687	\$98,546
Per Capita Income <sup>1</sup>	\$49,227	\$50,262
Income Inequality <sup>1,2</sup>	0.45	0.49
Unemployment Rate <sup>1</sup>	5%	6%
Percent of Residents Living below Federal Poverty Level <sup>1</sup>	8%	8%
Percent of Residents Living below 200% of the Federal Poverty Level <sup>1</sup>	22%	20%

#### Percent of Residents Living below 200% of the Federal Poverty Level in San Mateo by

Poverty has a significant impact on health status and outcomes; individuals with lower incomes report poorer health and higher risk of disease. The Federal Poverty Level (FPL) is the standard measure based on household size and income.

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5-year

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5-year Estimates

\*Note: Income inequality is represented by the Gini Index, where a score of 5 represents complete equality and a score of 1 represents complete inequality
